

## Firefox Link

Posted by Sabatino - 2009/09/24 09:23

---

Hallo,

I often use Firefox, a great browser, and sometimes go to Tools - Options - Security - saved password to read and erase the passwords for the sites that I visit.

Do you know if there is a way to shorten this path, maybe insert something in the toolbar to speed up this task?

Thank you

Hi,

I think one of your best bets is the Addon iMacro for FireFox, it can be found here:

<https://addons.mozilla.org/en-US/firefox/addon/3863>

Hope this helps.

I go to try.

Meanwhile thanks.

Bye
